

ARTT 100 ePortfolio Project

e-Portfolio Framework Page

Assignment #3 Coursework Page

On this page you should list the requirements for your major program. Make sure you understand and include:

- Your General Education Foundation and Distribution requirements
- Your Program (Major) requirements
- Your Program electives

Your major program requirements can be found at :

<http://catalog.montgomerycollege.edu/content.php?catoid=8&navoid=1322>

You should also include a semester by semester summary of the courses you have taken, and courses you are planning to take. Include at least your current semester and try to plan out at least one semester into the future. Don't worry if you need to make changes down the road. You can modify your e-Portfolio and your Coursework page at any time.

Refer to the [ARTT 100 Sample ePortfolio](#)

(<https://artt100eportfolioemplate.wordpress.com/course-work/>)

for an example of how the Coursework page might be set up for a General Studies HAAC program.

If instructors in your courses require you to set up an individual Course Page for your class (like we will be doing for ARTT 100) these should be set up as sub-pages of the Coursework page, and you should include links to those individual course sub-pages from the course listings included on your Coursework page.

The Coursework page will be evaluated as part of the overall evaluation of your ePortfolio, based on the Evaluation Template/Rubric that can be found in the ePortfolio module of your Blackboard site.

Due Date for review of initial Coursework page _____

This due date is for the initial development of this page. You can continue to modify it up until the final due date for your ePortfolio.
