

<b>JUNE 14 2022, RESOURCE CENTER/LIBRARY COMMUNITY WALKABOUT</b>		
<b>Question/Comment</b>	<b>Name</b>	<b>Response</b>
What changes are being made to the Resource Center?	Tanya DeKona	The Takoma Park Silver Spring Campus Library, located in the Resource Center Building on New York Avenue, needs to be renovated to provide students with a 21st century library equipped with much-needed study spaces, technology, and books. The primary goal of the project is to modernize the interior of the 61-year-old building to enhance students' success. The project is also necessary to address the structural integrity of the building and facilitate compliance with ADA requirements to include a new entryway into the building.
Is it possible to have an area within the Resource Center that is secluded and silent and an area where it is ok to talk?	Tanya DeKona	The objective is to make an accessible, safe, and modern library for students. The interior space of the library will be redesigned with designated quiet zones, as well as space for more participative and collaborative learning opportunities
Will the trees be protected?	Tanya DeKona	This is mainly an interior renovation project and Montgomery College will work with the City and County to comply with all tree protection laws.
My suggestion is to have an art mural and more quantity of green inside the Center	Tanya DeKona	Thank you for your feedback
