- 1 18:03:11 We're gonna jump in before we get started we're gonna be recording this, as we always do to make sure I can live on the website for anyone who wasn't able to meet. So we'll go ahead and get that recording started
- 18:03:22 right now. Thank you so much, so I've already introduced myself and of course you know Dr.
- 18:03:30 Bread. Stewart from the college Who'll be talking to us momentarily.
- 18:03:33 We've got Dave and Paul from the legate building Project team we've heard from before.
- 18:03:38 We also have marked with this tonight the architect on the library and resource center.
- 18:03:42 You've heard from previously, and We have 2 new folks drew in Matt from Gilbane.
- 18:03:47 We're working on the construction part of the library project so Matt, and true thanks for joining us tonight.
- 18:03:54 Good good discussion. Next slide, please. so as you'll recall. We have been doing these regularly updates on the legitimate building, and then we held 2 community forums over the last few months on the library, and resource center
- 18:04:09 instead of making everyone come to multiple meetings and multiple projects we oriented our process reoriented our process to covering as many updates as we can in one forum to respect everyone's time and also because we understand, that none of
- 18:04:19 these projects happen in a vacuum so it's probably good for you to hear how some of the coordination is taking place in the back end.
- 18:04:26 So we're gonna start with the legit building tonight.
- 18:04:28 We'll go through the construction updates and a pretty good level of detail, like we always do.
- 18:04:34 Well, then, stop at that point and take any questions you have on the legged building. We'll then do the same thing for the library and resource center and do the same thing for the hvac replacement on p one and P
- 18:04:41 2. we don't expect you to hold on your questions in the end, so we'll leave a break after each one of these topics for any questions that come up, but feel free to use the chat box throughout next slide please, so I am
- 18:04:53 going to turn it over to Dave to kick us off on all things like it building Dave.
- 18:04:58 Take it away. Yeah, Thanks, Michael. Good evening, everybody. So this slide.
- 18:05:04 You look familiar as we go through the like get billing updates.
- 18:05:07 We'll talk about kind of the current project status real quick progress update, and then kind of talk about let's.
- 18:05:14 So, as we talk about current status, you know, Code is still a you know. 19
- 18:05:18 You know it's still out there so we have all our local and Federal guidelines.
- 18:05:23 Our protocols that we're following to keep all of our workers safe.
- 18:05:28 You know. so we'll continue to do that and we keep monitoring again.
- 18:05:32 Just keep everybody safe and that safe operation. So we move into kind of the overall timeline, and you know we talked previously.
- 18:05:40 You know the demolition and the site utilities and started.
- 18:05:43 That work was complete. We have the foundation structure and support. the those activities were complete.
- 18:05:49 We started the building envelope, which will show some pictures of in a few minutes, and then we'll move into some building and into your site.
- 18:05:56 Work kind of later in the year, and then, you know, getting into that the final completion phase. But if you look at the pictures on the next slide, you can see in the upper left.
- 18:06:06 These these were aerial photos for july so we're a little farther along than what this shows, but it gives a good idea of kind of the building, and how it sits.
- 29 18:06:14 You know we've got all the setbacks from Tacoma Avenue as we talked about in all the design shorets.
- 18:06:19 And you're making great progress we're looking so if you look at the the next picture and move on to the next slide.
- 31 18:06:29 That's kind of a more current picture you know taken from the site.
- 18:06:33 So you can see on the left hand portion of the building you can see the the masonry units that are installed all of the backup.

- 18:06:39 That we talked about last time we got all of that work in, and then down by where the greenhouse will go.
- 34 18:06:47 Excuse me and then you'll see kind of at the top of the building. that that steel framing up top is where the roof screen will go for the mechanical units, and you can see that that's set back
- 18:06:56 like like we've talked about it all the shoretes you know again, just to pull it back from the edge of the building.
