Yes 1:1 is acceptable here. Thanks.

Marty,

I am working with MC folks to make a selection for the replacement tree, assuming it is a 1:1, tree for tree replacement here. Probably 2" cal. native (hopefully) ornamental, like Amelanchier or Cercis. We just wanted to confirm that you were on board with this before we made a final selection.

Andy

Hi Andrew,

Thanks for the heads up here. This email correspondence will suffice to document the change. Are you able to provide any plan documentation of the replacemeting planting that will be used to account for the removal of this tree?

Marty & Stephen,

The College is looking to remove one additional tree that we had anticipated on keeping, see image below. I gather that the footings for the proposed structure improvements (and the associated excavation) are more extensive than we were aware of.

The tree in question is tree TM, 12" flowering cherry. Can this be a field change if both of you concur? Or do we need to update any plan sheets? The College is going to put a new tree back in this general location as well, at the end of the project. Likely a bit further away from the building!

Let me know what you all think. Thank you for your help!
