

December 13, 2022 PROJECT UPDATE FORUM

Catherine and Isiah Leggett Math and Science Building

Question/Comment	Name	Response	Action
When will the dome go into the planetarium in the Leggett building?	Harold Williams	According to the current project timeline, the dome installation is expected to begin in the spring of 2023.	
Some residents in the area have expressed concerns to me, not about the construction vehicles themselves, but about students being dropped off along NY Avenue as the drivers often sit and wait and it clogs the artery. Does that also affect the movement of your vehicles and, if so, will you provide traffic coordinators?	Elizabeth Wallace	While this wasn't much of an issue during the pandemic, we've seen this problem reappear now that students are back on campus. To combat this, we have Montgomery County Police officers in the problem spot for traffic coordination, and we have a designated spot where students are supposed to be dropped off when arriving to campus. For the spring semester, we will review our procedures and ensure that dropoffs are coordinated at the right location on campus with the help of our public safety officers.	
How does the Resource Center and the Leggett building work interact with each other?	Elizabeth Schlackman	Both construction partners are committed to coordinating on all major project actions through their respective project managers at the College. In advance of project actions that may impact the other construction site, construction partners inform this issue well in advance to ensure there is effective communication and planning.	
Do you expect the projects to overrun?	Elizabeth Schlackman	As of right now, we do not intend to overrun the project schedule. We expect to complete the project by January 2024.	

Library Resource Center

Question/Comment	Name	Response	Action
Where will science classes be held if not in the resource center?	Harold Williams	We will follow up separately to provide an answer on where classes are being held. Post-meeting Update: This has now been resolved, as alternative arrangements were made for the science classes.	

Pavilions 1 and 2
