

March 7, 2023 PROJECT UPDATE FORUM			
Catherine and Isiah Leggett Math and Science Building			
Question/Comment	Name	Response	Action
About how many parking spaces will be there?	Sonja Jackson	Initially we said about 20 in that parking lot and going off of Takoma Avenue. I believe 12 regular spaces and three or four handicapped spaces.	
Library Resource Center			
Question/Comment	Name	Response	Action
Will any aspect of the project touch upon Georgia Avenue? I ask because I use the only bus (a 70-Metrobus) to get to campus and it drops me off on Georgia Avenue, not far from the Health Sciences Building. I am interested in anything that Montgomery College can do to support students who must wait for this bus and walk from the drop off point. A bus shelter would be nice. I don't know if this is purely WMATA responsibility.	David	David, this is Brad Stewart, the campus provost. I will have someone from our student support offices, one has to do with transportation and the other has to do with forms of student services, and they will be reaching out to get in touch with you after they figured out what WMATA can do to bring you more effectively down Georgia Avenue to the campus, and maybe bring you over to the east side of campus. We will go nowhere near Georgia Avenue with either project. The Leggett building will only go as far west as Fenton St. and the same thing is true for the Resource Center and Library project. If you have any more questions, please feel free to reach out to me directly and we will work to make sure we get your answers but you should be hearing from MC employees Kristin Roe and Mark Pace.	
Is there a link to interior floor plans?	Family Fisher	Most of this work and our conversation, as you know Michael, has been limited to the exterior and how the projects relate to the larger neighborhood and community. We did see some of the interiors of the Leggett building. As David and Paul gave updates on the progress of the project, the interior of the library is now solely demolition. The nature of this is more about the exterior and the impact on the community and our immediate neighbors.
